R Markdown

reproducibility:

train new analysts
whose only
workflow is a
reproducible one

efficiency:

consistent
formatting + built in
“show your work”
= easier grading

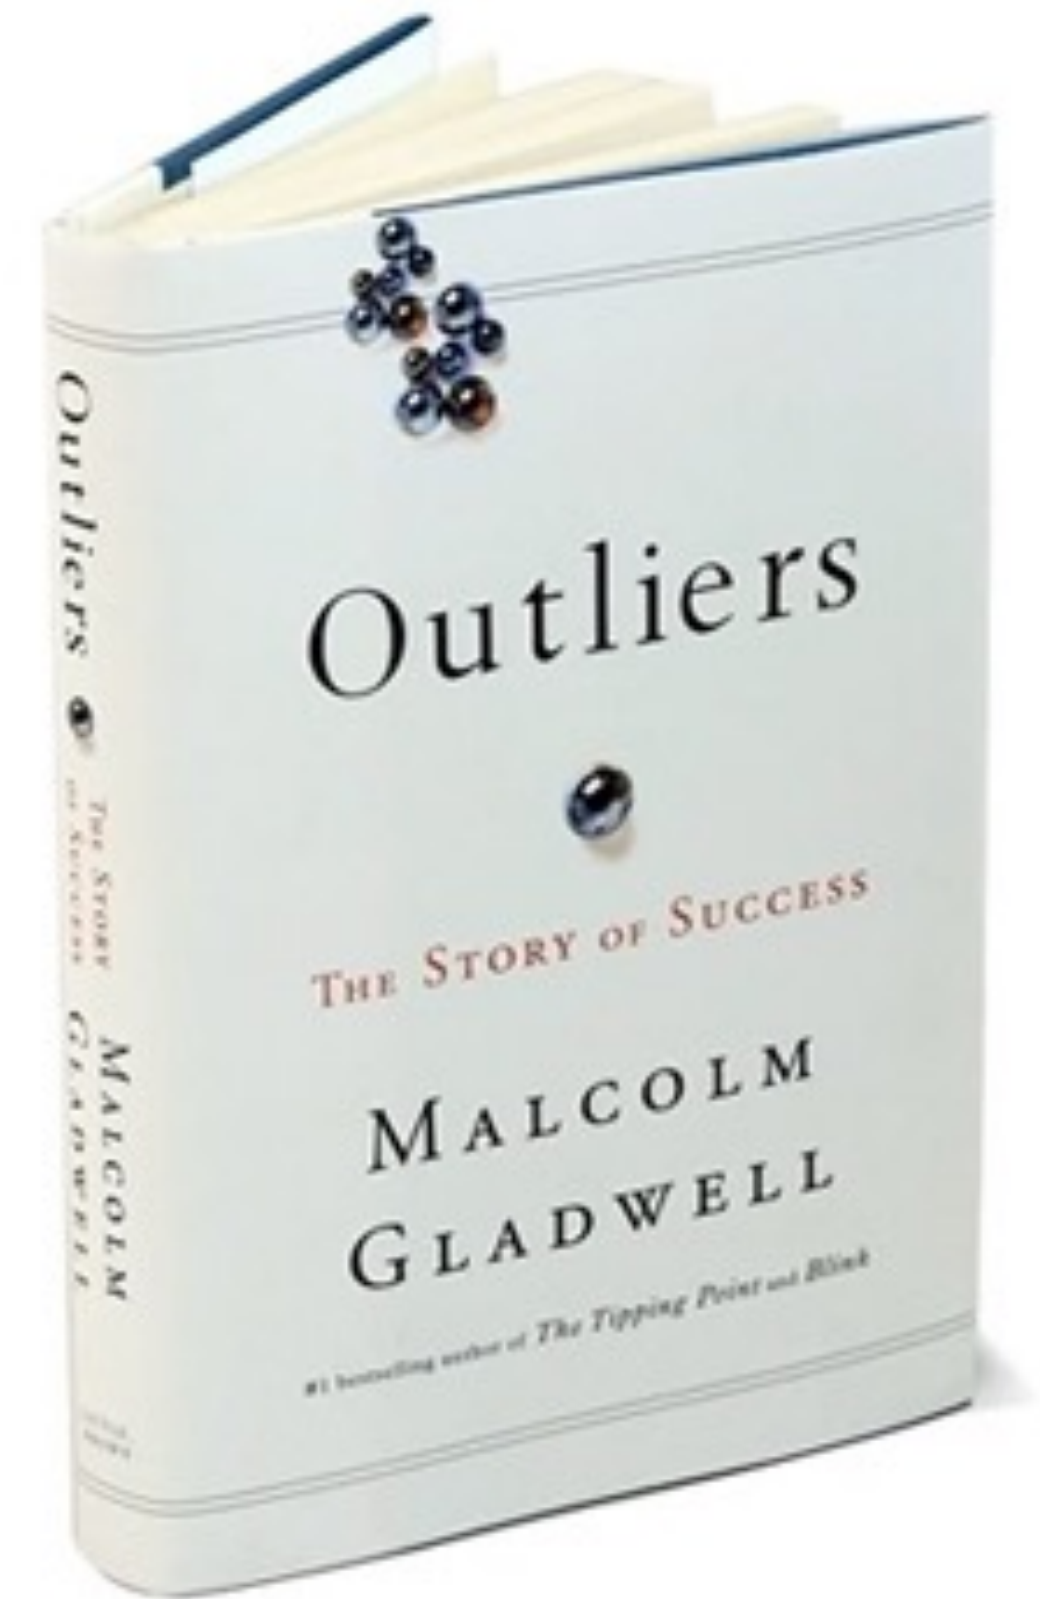

pedagogy:

code + output +
prose together
syntax highlighting
+ notebooks FTW!

key to success:

iterative
development:
knit early,
and often

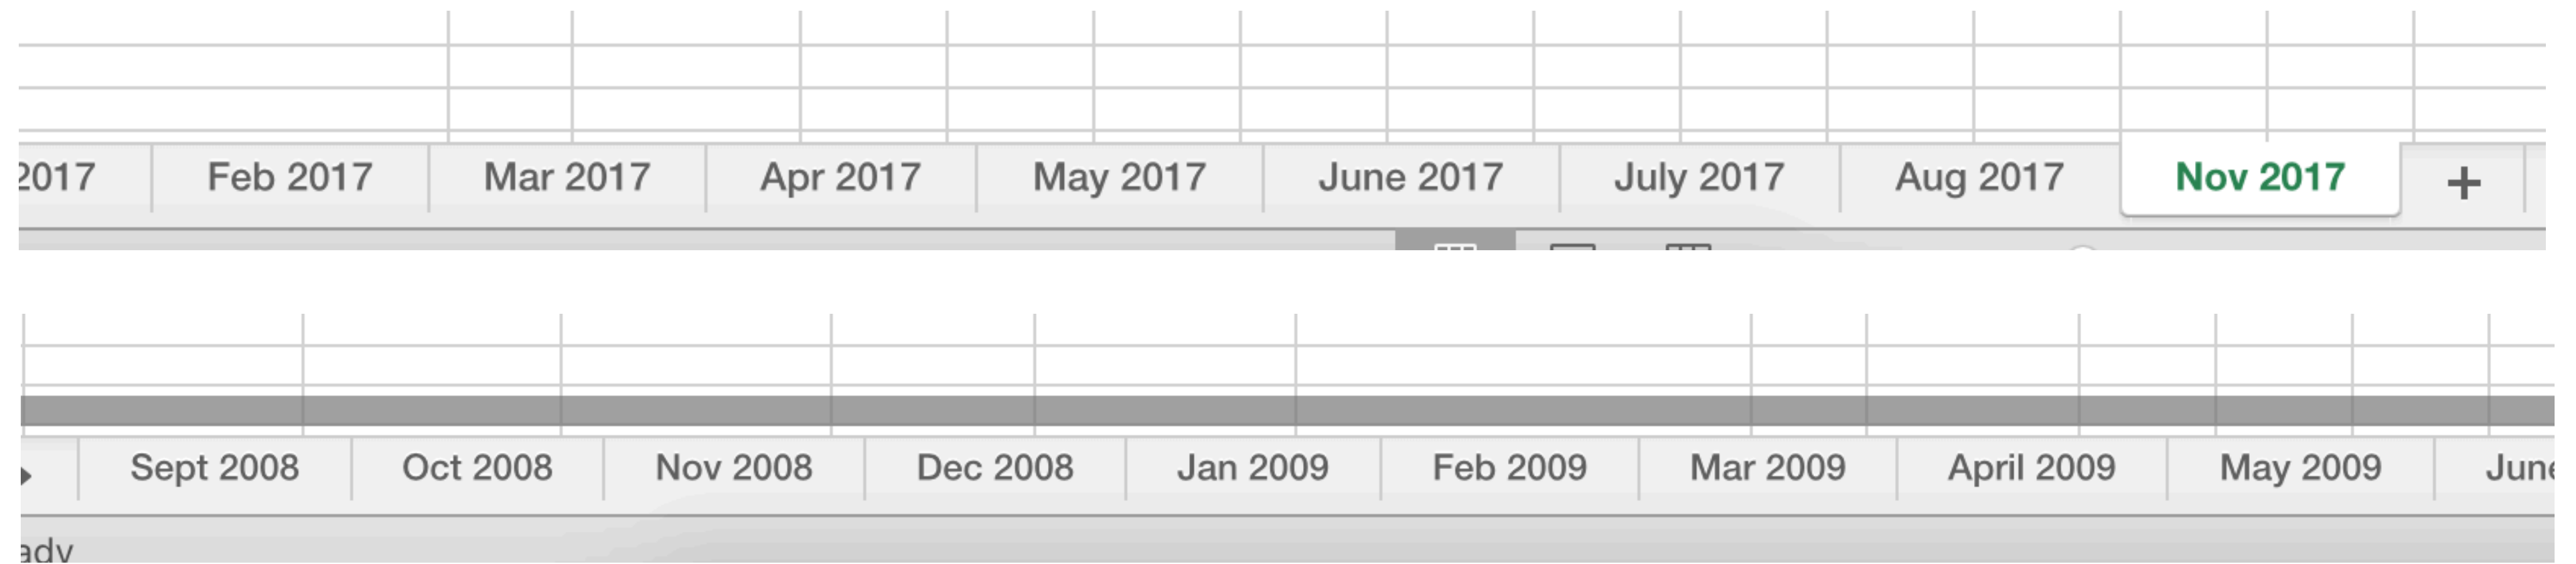

? 10,000 hour rule

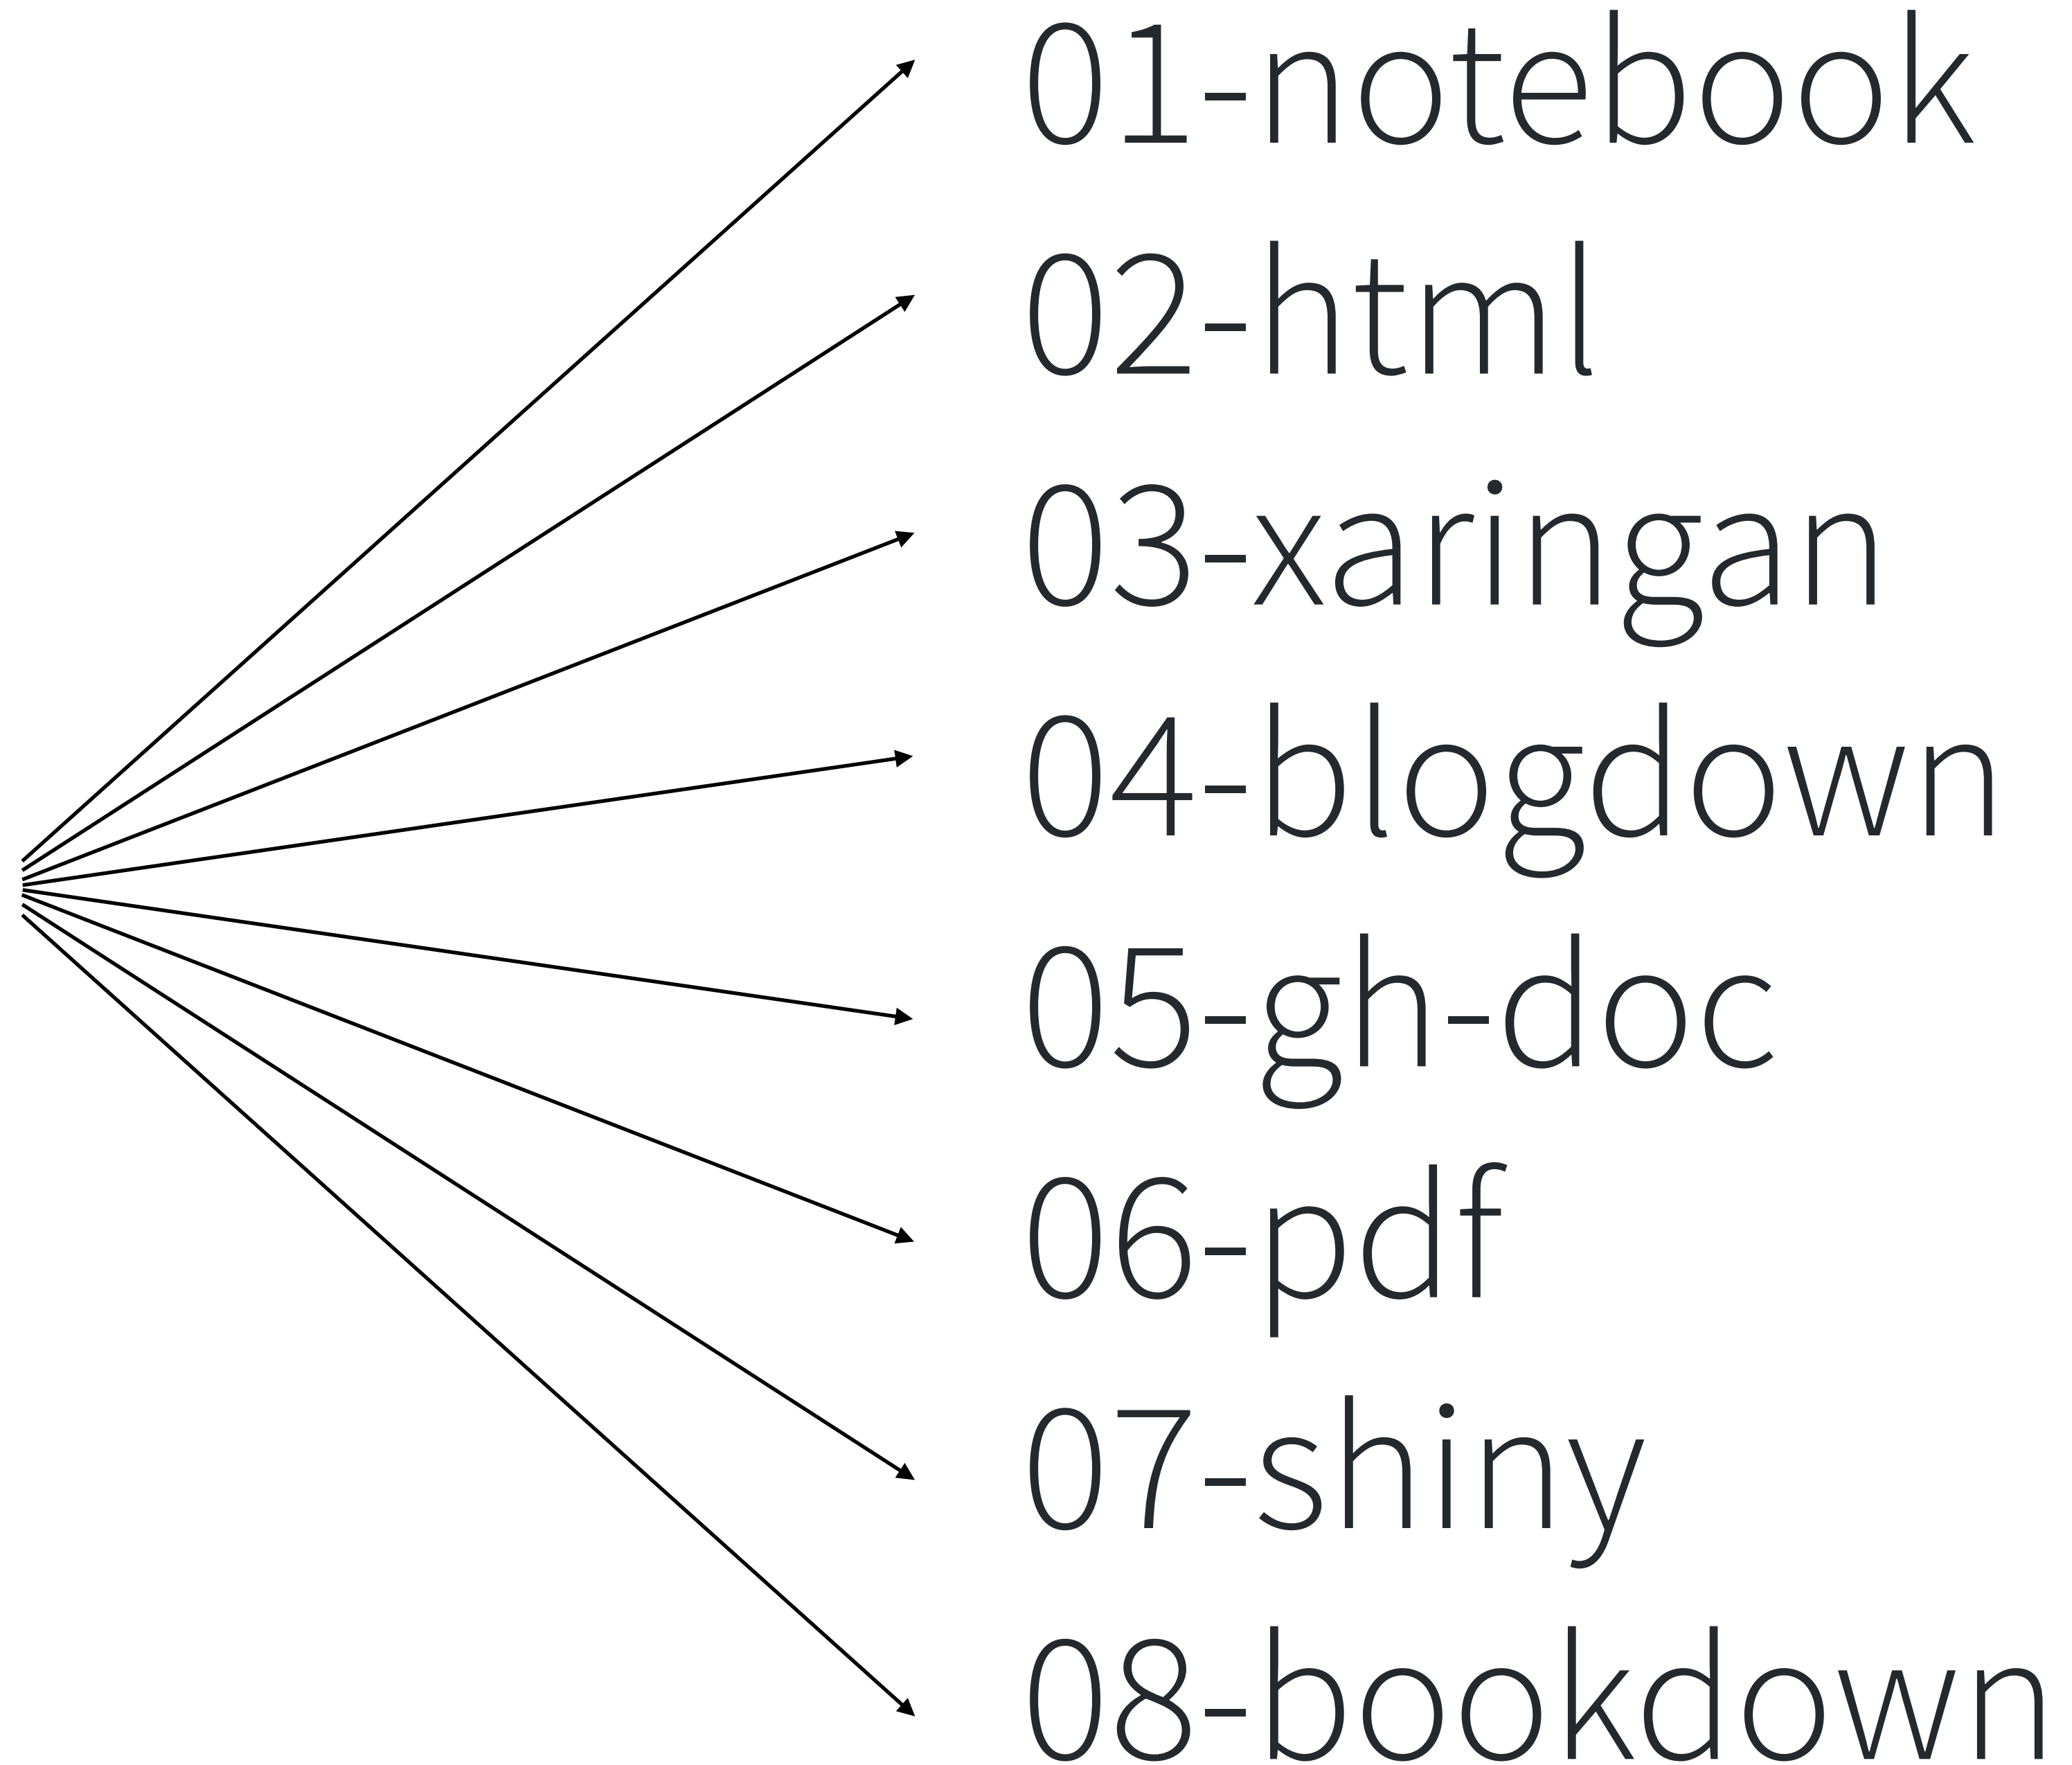

use R for everything*

*that I do on the computer

use R for (almost) everything

*that I do on the computer

demo

The content is all inside your document, she said to me
The rendering is easy if you knit it periodically
I'd like to help you in your struggle to be reproducible
There must be eight ways to knit your R Markdown

!!thank_you
